# M. ZAIDAN AKBAR

Jakarta, Indonesia

zaidan.getty@gmail.com | +62 878 7508 7060 | https://www.linkedin.com/in/zaidanakbar/

## Education

**The University of Edinburgh –** Energy, Society, and Sustainability (M.Sc) **Sep 2024 – Aug 2025**

- Awarded degree with *Distinction* (180 credits)
- Courses Taken: Resource Recovery and Circular Economy, Environmental Modelling, Energy & Society, Energy Policy and Politics, Energy in the Global South, Energy and Environmental Economics, Carbon Accounting & Pricing
- Dissertation: "*Determining Optimal End-of-Life Strategies for Wind Turbines using Analytical Hierarchy Process (AHP) Model"* in collaboration with Green Cat Renewables Ltd.

**Brawijaya University -** Environmental Engineering (B.Eng) **Aug 2019 – Dec 2022**

- CGPA: 3.75 out of 4.00 (147 credits)
- Undergraduate Thesis: journal link
  *"Optimization of the Polyethylene Terephthalate (PET) Plastic Waste Management System by Digitalization"*
- Assisted in research on using Palm Oil EFB as feedstocks for a Hydrothermal Carbonization (HTC) wet-dry torrefaction

**Software used:** ArcGIS, QGIS, AutoCAD, Microsoft Excel, Looker Studio, Python, R, OpenModel, Simile

## Work Experience

**ASEAN Centre For Energy** **Jan 2026 – Present**

*Programme Officer of PEEB-ASEAN*

- Providing programme management support for the implementation of PEEB-ASEAN Component 1 (EUR 2M; 11 ASEAN Member States), contributing to ASEAN's 40% energy intensity reduction target by 2030.
- Supporting planning, coordination, and monitoring across four key outputs, including consultant procurement and evaluation for the Policy Landscape Analysis, Digital Hub enhancement, regional workshops, and country-level technical assistance.
- Coordinating multi-country programme governance and stakeholder alignment across government agencies, development partners (AFD), the ASEAN Secretariat, and ASEAN Member States.

**Constantine Wind Energy** **Sep – Dec 2025**

*Operations and Development*

- Analysing the lifespan of 203 small-medium wind turbines under different incentive scenarios to identify optimal end-of-life strategies, and reviewing lease terms and dismantling requirements to deliver more accurate decommissioning forecasts
- Create site layout drawings in QGIS for site planning and search for potential wind energy sites in the UK; compile and standardize Health & Safety records, including emergency plans, access instructions, and turbine specifications
- Assisting in pricing strategies development for long-term PPAs, site feasibility assessments, and due diligence on wind turbine data for potential wind portfolio acquisitions from a bankrupt renewable energy company

**Edinburgh Earth Initiative** **May – Jul 2025**

*Earth Associate - Circular Economy*

- Mapped circular economy practices within the Estates Department using Social Network Analysis in Python, focusing on equipment reuse, refurbishment, and resource-sharing initiatives through stakeholder interview data collection
- Analyzed over 1800 material flows to assess cost efficiency and carbon emission, identifying opportunities to enhance sustainability across university operations and quantifying annual savings equivalent to 300 tonnes of $CO_2$

**Arthur D. Little** *(Global Management Consulting Firm)* **Apr – Jul 2024**

*Spring Business Analyst, SEAP Region*

- Conducted market research and product analysis for new product launch for a leading FMCG company in Indonesia
- Analyzed data center, fiber market, and broadband development for global telecommunications providers in the SEA region
- Developed a digital platform strategy and implementation roadmap for an international motorcycle manufacturer
- Facilitated an energy transition workshop, targeting a 30% carbon reduction by 2030 for an international telco company

**Indika Energy** **Jul – Nov 2023**

*Project Lead (Breakthrough Leadership Project under YLI by McKinsey and Co.)*

- Assessed 4 potential markets for EV medium buses using the Desirability, Viability, and Feasibility (DVF) framework
- Coordinated research on OEM product sourcing from China, Korea, Germany, and the US
- Led pilot rollout planning and financial analysis, including P&L and TCO calculations for three different use case scenarios

**Buangdisini (Waste Management Startup & Plastic Recycling Facility)** **Jul 2021 – Sep 2023**
*Chief Operating Officer*

- Successfully secured $150,000 in pre-seed funding for Buangdisini Startup
- Implemented lean manufacturing methods, raising the Smart Waste Center's GPM from 7% to 23%
- Assembled a comprehensive and operational full line of recycling machinery, managing all stages from ideation to execution and planning to controlling

## Projects

**Developing an End-of-Life Decision-Making Tool for Wind Turbines** **Mar – Aug 2025**
*Student Researcher in collaboration with Green Cat Renewables Ltd.*

- Conducted in-depth analysis of wind turbine decommissioning options using the Analytical Hierarchy Process (AHP) to evaluate environmental, economic, social, policy and technical factors
- Developed a decision-making model to identify optimal end-of-life strategies, contributing to sustainable energy practices
- Collaborated with industry experts to validate findings and present actionable recommendations to stakeholders

**Community Wind Farms Decommissioning Pathways in Orkney, Scotland** **Jan – Apr 2025**
*Student Researcher in collaboration with Xodus Group Ltd.*

- Analyzed policy frameworks and regulatory challenges for decommissioning onshore (community wind farms) and offshore wind farms, identifying key differences and opportunities for improvement
- Investigated socio-economic challenges and benefits related to wind farm decommissioning, including community engagement, job displacement or creation, and local economic impacts within the context of circular economy
- Collaborated with industry partners to provide actionable recommendations for policymakers and stakeholders, supporting Scotland's transition to a circular economy in renewable energy

## Leadership and Organizational Experience

**Young Leaders for Indonesia by McKinsey & Co.** **Mar – Nov 2023**
*Awardee*

## Training, Courses and Certifications

**Core Consulting Training** (Communication & Presentation, Problem Solving, Efficient Research, PPT, and Excel) **2024**
*Arthur D. Little*

**Google Data Analytics Professional** **2024**
*Coursera*

**Corporate Finance Foundations Professional** **2024**
*Corporate Finance Institute (CFI)*

**Google Project Management Professional** **2023**
*Coursera*

**Integrated Management System Awareness** (ISO 9001:2015, ISO 14001:2015, ISO 45001:2018) **2022**
*Safex.Inc*

**Solid Waste Management** **2022**
*EdX by WBGx – SWM2001x (World Bank Group)*

**Six Sigma: Green Belt** **2022**
*IIBA*

## Honors and Achievements

- **Fully-Funded Master Degree Scholarship** (*LPDP Awardee Batch PK-239)* **2024**
- **Top 10 Graduates of YLI National Wave 15** (*Young Leaders For Indonesia by McKinsey & Co.)* **2023**
- **Runner Up of Youth Sustainable Project Competition** *(EU in ASEAN)* **2023**
- **Winner of Innovation Challenge Indonesia** *(GIZ & Adelphi)* **2022**
- **B20 and O20 Summit Delegate, Bali, Indonesia** *(World Economic Forum)* **2022**

## Language Proficiency

**English** : CEFR - C1 (IELTS 7.0); **Bahasa Indonesia** : Native

## Personal Accomplishment

- 5x Marathons (Sub-3:45), 2x Ultra Marathons, Former Indonesian National Judo Athlete Youth Team
